About Us

Our experience and expertise can create new opportunities for your business

Here at Combind we provide a comprehensive range of packaging materials, cardboard boxes, machinery & tools which is fully supported by an after sales technical service.

The company was established in 1985 and since then we have experienced significant growth. Our success is not only due to the quality of our products; it's down to our people, our expertise and the service we provide our customers.

Key Pillars Of Our Business

Why Choose Us?

Expertise

- Our team of experts will work with you to deliver the perfect solution for your business

Full Circle Service

- We offer a full circle service, advice & expertise, a comprehensive product range, and an after sales technical service

Product Range

- We offer the most comprehensive range of packaging materials and machinery available to Irish Industry

Innovation & Sustainability

- Practical, sustainable packaging solutions, tailored to your applications is what we do

Bottle Packaging To Protect, Promote & Delight

Our range of protective packaging for bottles has been designed to ensure that your fragile products will arrive safely in your consumers' hands. Our solutions provide full protection with additional opportunities to promote your brand by printing on the outside and inside of the packaging.

Our team of designers can develop customised protective packaging for diverse bottle shapes and sizes.

The range is all made from corrugated material making it a fully recyclable and eco friendly solution.

Features

- 100% Recyclable
- Print up to four colours (MOQ's apply)
- Customised to be fit for purpose for your bottle

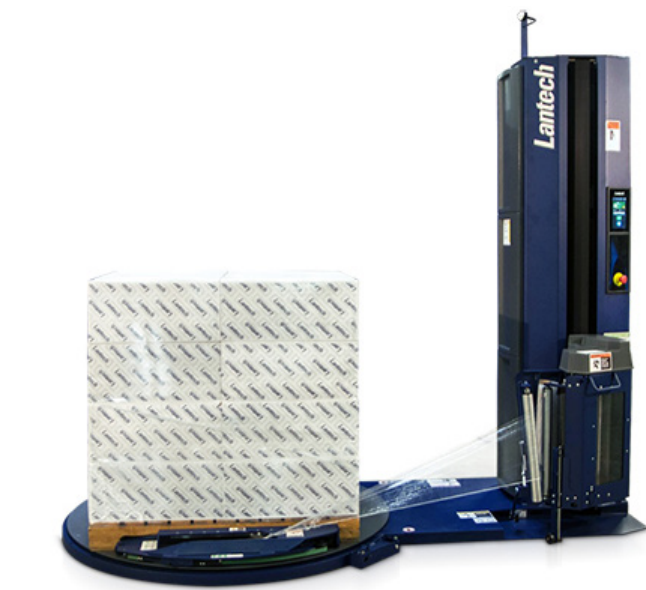

End Of Line Packaging For Distilleries

Introducing the new ENO Ergonomic Wrapping Tool. Consistent tension with 40% less film.

The Spiny S140 TP allows the pallet truck to enter the turntable, saving on space.

The new Lantech QL 400 XT comes with a raft of technology. Load Guardian automatically sets the machine up for the operator. The XT Cut & Clamp systems keeps the forklift driver on the forklift, using a remote control to operate the machine, saving 2 minutes per pallet.

Combind Stock a full range of stretch films to match our machines, including the new range of Fiber Film stretch film, that offer film reductions of 50% with more stable pallets.

All Lantech Equipment comes with Lantech's "Built Tough 3 Year Warranty".

Combind are Agents for Lantech Case Sealers, capable of up to 30 cartons per minute. The machines are available for use with both tape and hotmelt. We also stock a large range of plain and printed tapes for both hand & machine applications.

Lantech Case Erectors are also available to produce up to 30 cartons per minute and are capable of producing most size & carton types. Combind also manufacture cartons on our new state of the art 4 colour Casemaker.

The Lantech Profit Pack packaging station offers semi-automatic packing. The case erector makes up the carton and dispenses to the operator, a product conveyor moves the product to the operator. Then the operator simply places the product in the box and presses a release button for the case to move ahead to be sealed in the case sealer.
